

mm Universe @ NIKA2

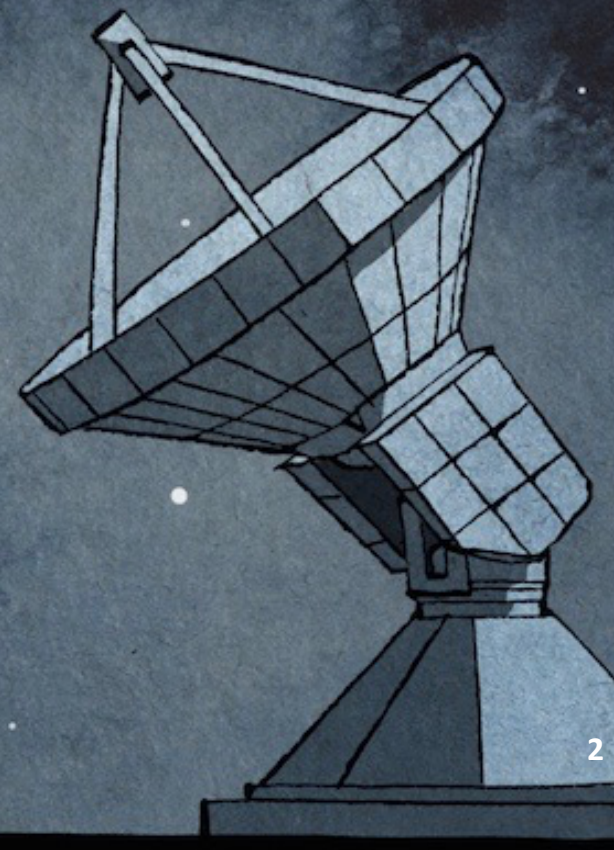

Observing the millimeter Universe with the NIKA2 camera

2019 June 3-7
LPSC
Grenoble
FRANCE

Overview

**This conference is dedicated to the
scientific exploitation of
the NIKA2 camera
installed at the IRAM 30-m telescope
(Pico Veleta, Spain)**

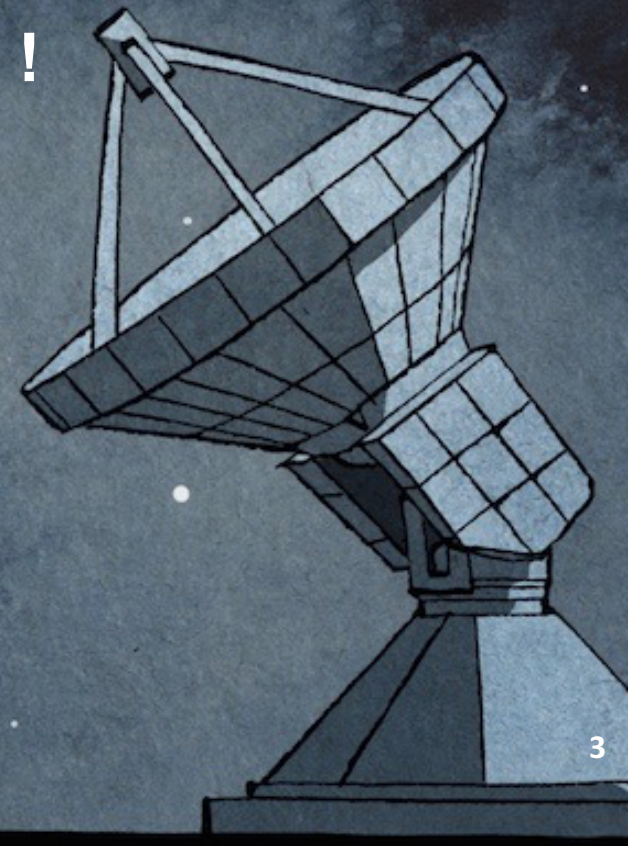

Topics

- **Galaxy clusters (from observation to cosmology)**
- **Galaxy formation in the early Universe**
- **Nearby galaxies**
- **Galactic formation**
- **From dust to planets (and stars)**
- **Instrumentation**

54 talks !

see timetable on the website

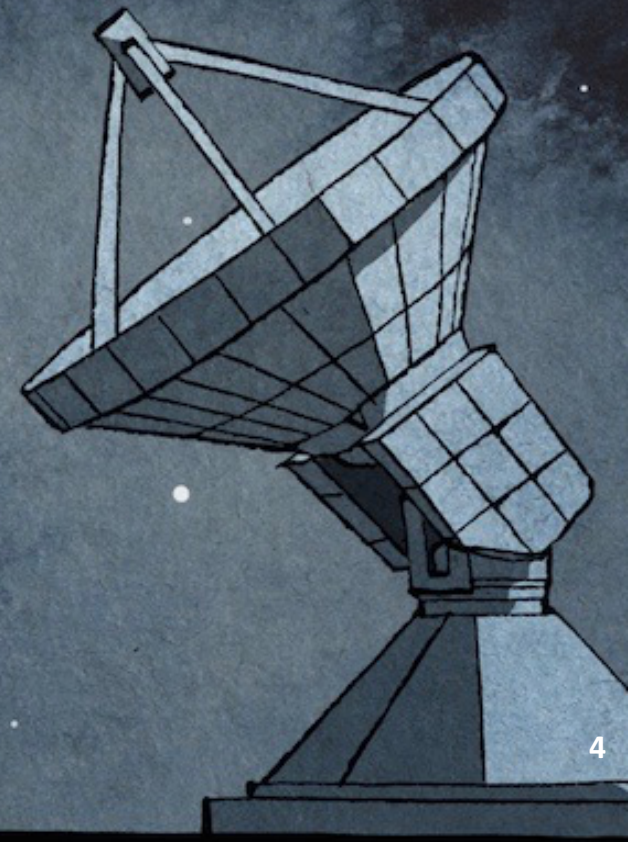

Speakers

To all speakers, please

- upload your slides on indico

→ if it doesn't work, send them to me & Laurence (Wednesday)

- keep at least 5 minutes for questions
in your allocated time-slot

Local Organizing Committee

Johana Paquien

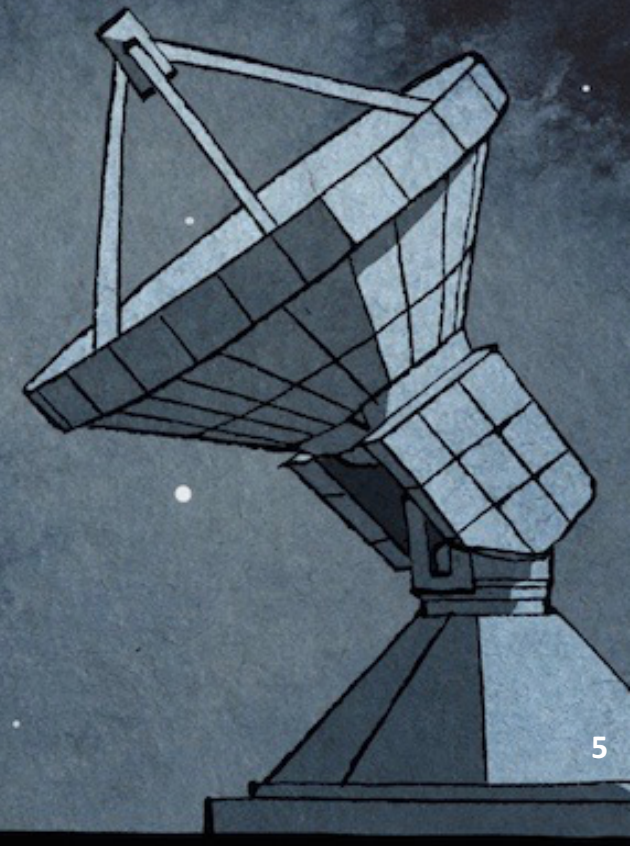

Andrea Catalano

Florian Kéruzoré

Frédéric Mayet

Juan Francisco Macias-Pérez

Laurence Perotto

Proceedings

The conference proceedings

will be published by

Web Of Conferences

in the European Physical Journal

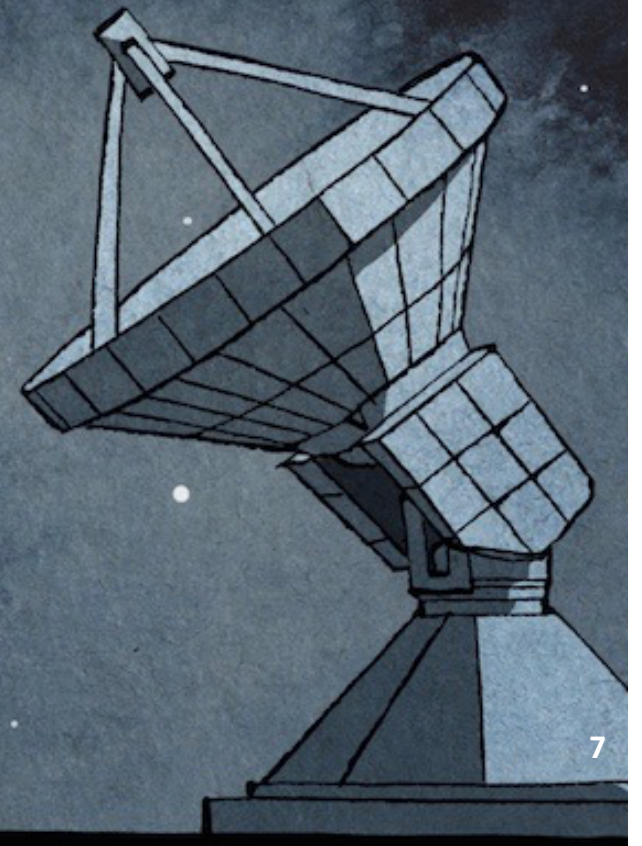

• <http://www.epj-conferences.org>

- 5 pages per talk
- Deadline: 01/09/2019

More details later •

Coffee Breaks and Lunches

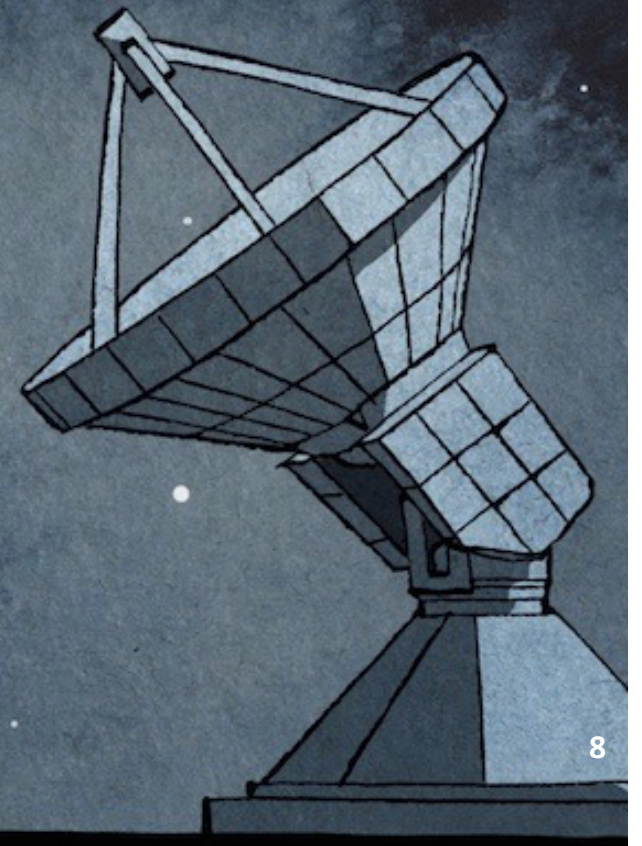

**Coffee breaks, Lunches
will be served at LPSC
in the room downstairs
(just follow the signs)**

Cocktail dinner & Picture

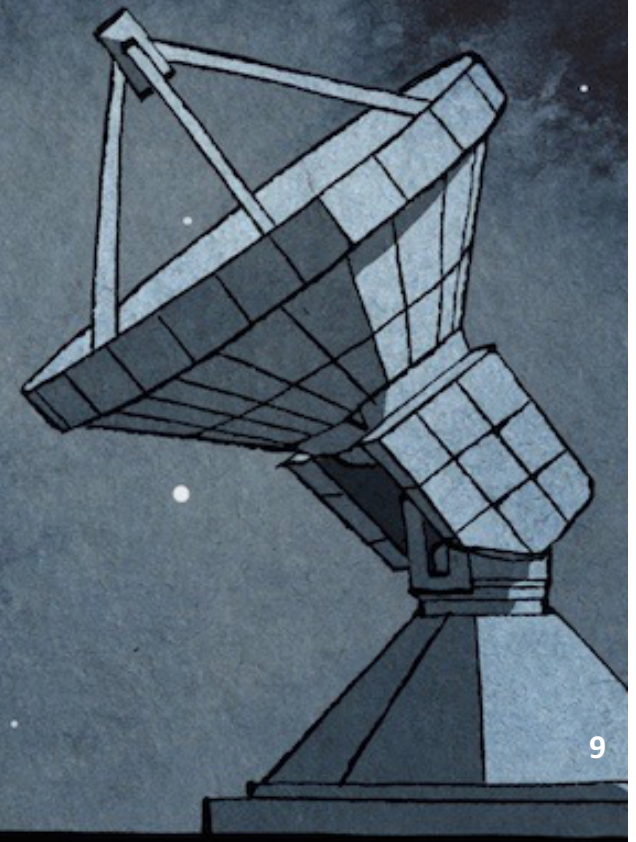

On Thursday evening (6 pm), we will have

- the conference picture (in front of LPSC)
- the cocktail (same room)

mm Universe conference

. The purpose of this conference
is also to bring together
a scientific community
working on
science done with NIKA2 observations

mm Universe conference

Whether we are
members of the NIKA2 collaboration

or OT members,

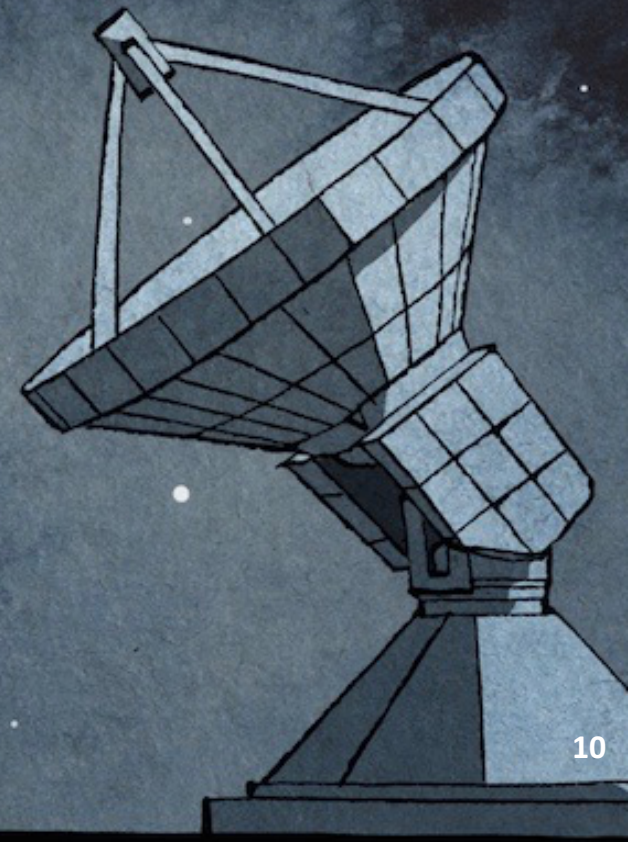

we share the same

camera, telescope, calibration,

weather conditions...

• The scientific objectives may be different

but the means are the same.

Next mm Universe conference

I think the mm Universe conference

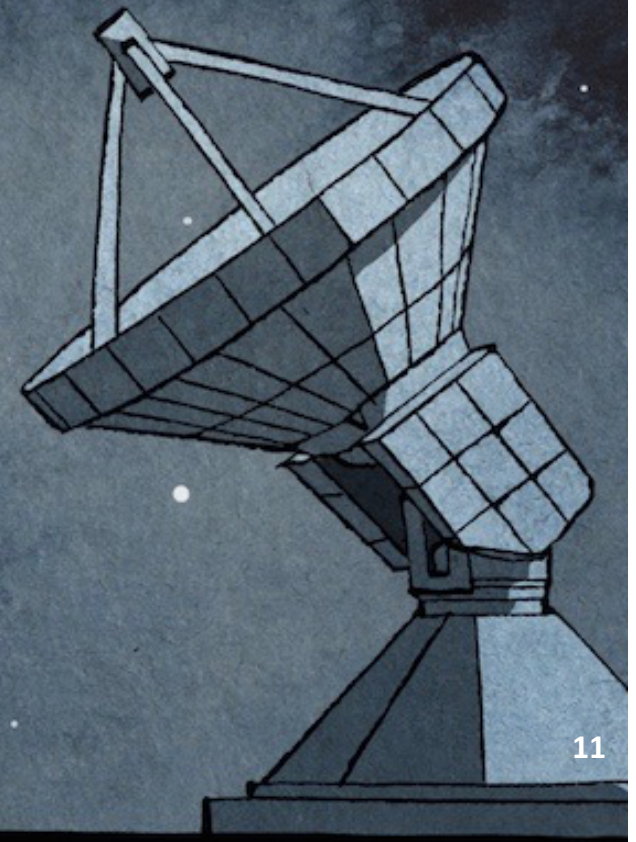

could become

a series of conferences

during the whole lifetime of NIKA2.

Call for volunteers for

mm Universe @ NIKA2 2020

Fundings

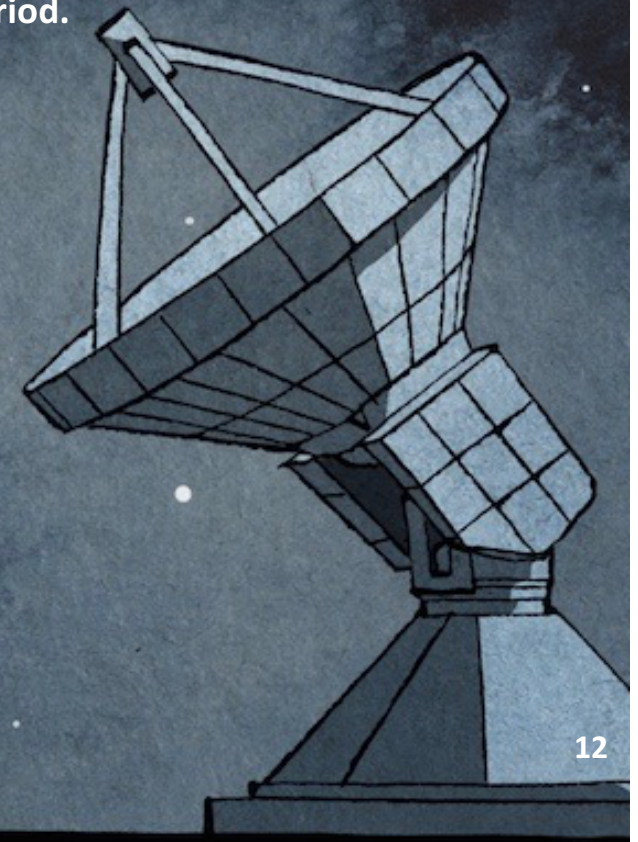

NIKA2Sky

NIKA2sky is a project funded by the ANR (French agency) for the 2015-2019 period.

The purpose was to ensure the scientific exploitation of the

French part of the guaranteed time.
