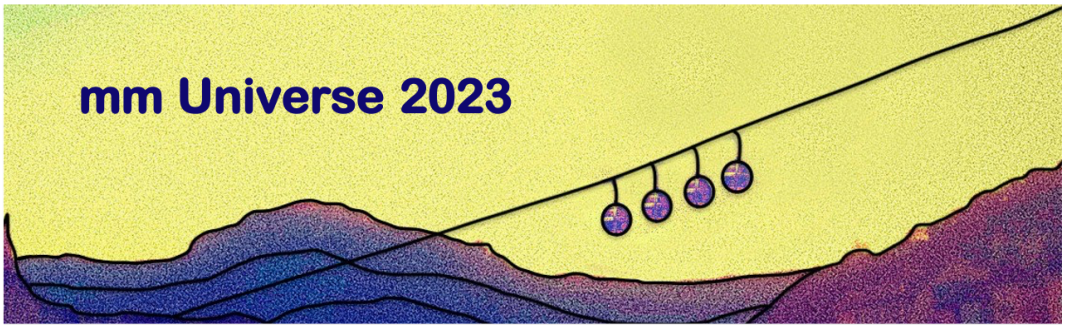
Session Program

Jun 26 – 30, 2023



Observing the Universe at millimetre wavelengths

Friday P

LPSC Grenoble

Fri, June 30

1:30 PM

Friday P

Session | **Location:** LPSC Grenoble, Amphitheatre | **Convener:** Lindsey Bleem

1:30 – 2:00 PM

Probing the Evolution of the Intracluster Medium with Joint X-ray+SZ Surveys

Speaker
Michael McDonald

2:00 – 2:30 PM

First massive galaxy clusters emerging from the cosmic web at z~2

Speaker
Stefano Andreon

2:30 PM

2:55 PM

Friday P

Session | **Location:** LPSC Grenoble | **Convener:** Laurence Perotto

2:55 – 3:15 PM

The South Pole Telescope Strong Lensing Cluster Sample

Speaker
Lindsey Bleem

3:15 – 3:40 PM

Prospects for Kinematic Sunyaev-Zeldovich Measurements from South Pole Telescope data.

Speaker
Srinivasan Raghunathan

3:40 – 4:00 PM

Fluctuations in Galaxy Clusters at millimeter wavelengths

Speaker
Charles Romero

4:05 PM
